Step 1: Go the official Docker website:
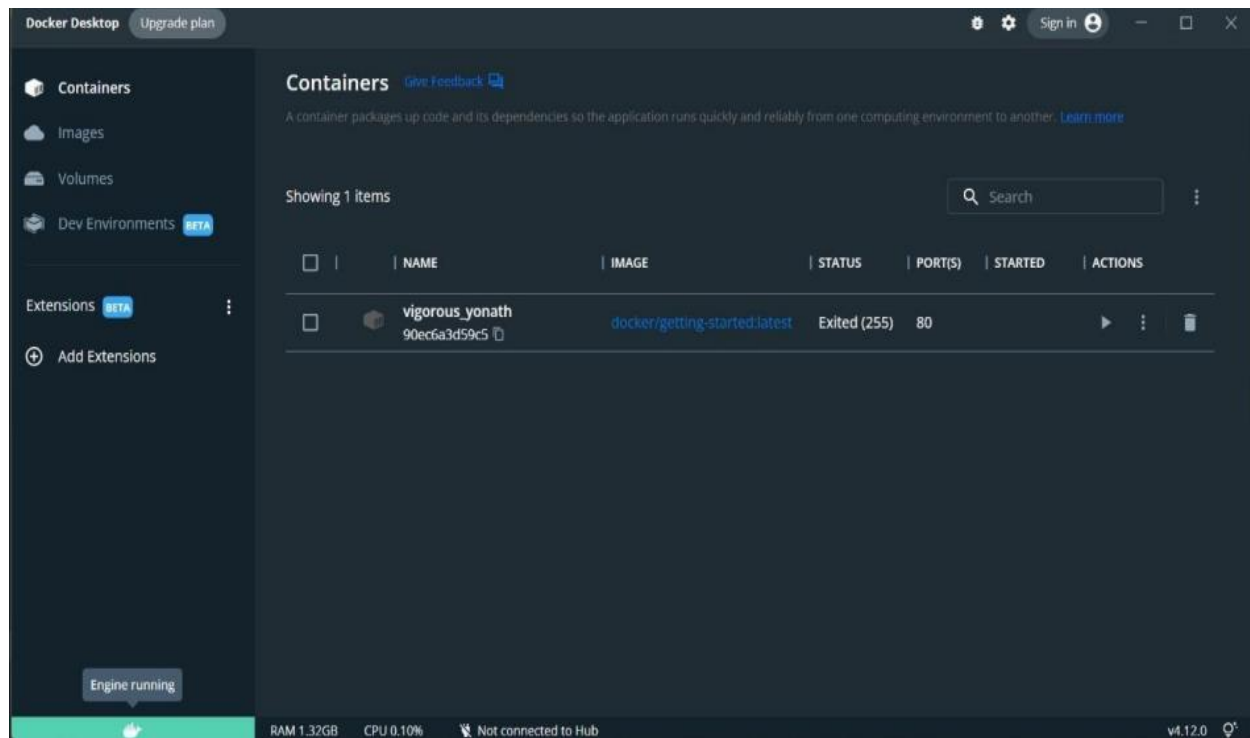

https://docs.docker.com/desktop/install/windowsinstall/

Step 2: Click that button (Docker Desktop for Windows) and download willstart and it takes few minutes to complete.

Step 3: Go to downloads in browser (or) type ctrl + J, it will navigate to download page and double-click the particular docker file.

Step 4: Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

Step 5: Docker willstart correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

Step 6: Finally, the docker isinstalled successfully.
